

## GSM-3AB GSM Intercom

GSM intercom systems use mobile phone technology to communicate through existing cellular mobile telephone networks. All you need is a SIM card (not provided)

- GSM intercom using mobile cell phone networks, 850/900/1800/1900 MHz bands.
- 2 piece design, just a speech panel with everything inside, and a wall mount antenna.
- No range limit.
- Rings up to 3 telephone numbers (land lines and/or mobiles) in sequence when call button pressed.
- Gate / Door release relay built in, simply press the star key to open!
- Access control for up to 100 numbers using caller ID, at no call cost to users (ring intercom to open gate or door).
